# Plenary Themes

- Converging Policies, Practices and Process through Public Private Partnership
- Geospatial Technology Trends
- Geospatial Processes Enabling Workflows
- Geospatial Practices Driving Policies

# Geospatial World Awards

## **Geospatial Application Excellence Awards**

- For exemplary usage of geospatial tools in various fields (Governance, Infrastructure, Public safety, Utilities, Design and Engineering, Environment, Agriculture, Mining and Exploration, Transportation management, Business Intelligence, Insurance, Disaster Management)

## **Geospatial Technology Innovation Awards**

- For innovations and developments in geospatial technology e.g. Remote Sensing, Photogrammetry, LiDAR, 3D Modelling, Cartography, Web GIS, Mobile mapping, Enterprise GIS, Topographic surveying instruments, GIS ready imagery etc.

# Geospatial World Awards

## **Geospatial Policy Implementation Awards**

- Policy makers and implementers whose work directly impacts in development of geospatial science, technology and business may submit their nominations for this category.
- Nominations now open
- Deadline: 15<sup>th</sup> December 2014
- <http://awards.geospatialmedia.net>

# Expected Participation

- 2000 + people across the Globe
- 65% participation expected from Europe
- 35% from Asia Pacific, Middle East, Africa, North America and Latin.

### WHY TOGETHER?

Considering the underlying objectives of both INSPIRE and Geospatial World Forum is to promote the optimal use and implementation of spatial data and resources for growth, there is an existing foundation for a synergised effort. While INSPIRE is designed to discuss the latest developments of the INSPIRE Directive, addressing common policy issues, applications and implementations of SDIs, Geospatial World Forum features success stories of private industry and users of spatial data boosting the business of spatial information and downstream dissemination of the technology applications. By combining efforts, both INSPIRE and Geospatial World Forum can create a strong case for Public-Private Partnership initiative and to strengthen dialogue and discussions for promotion of geospatial technologies with all stakeholders while enabling networking of professionals at global scale.

**“**

The 2015 Geospatial World Forum – INSPIRE conference offers a stage for stakeholders, governments and businesses to discuss and develop synergies between the rapidly converging geospatial technologies and ‘good governance’ (institutional, legal and common framework) initiatives

**THEME CONVERGENCE**  
 POLICIES | PRACTICES | PROCESSES  
 PUBLIC | PRIVATE | PARTNERSHIP

Policies, technologies and applications are the three key factors affecting growth of geospatial industry. Formulation of policies and its associated implementation requires strong engagement and propagation of innovations and practices. Public private partnership is one instrumental driver not only in bridging technological gaps, but in integrating stakeholders for maximum impact. The theme CONVERGENCE: Policies + Practices + Processes via PPP aims to address the need for greater coordination among policy-makers, technology providers and users to benefit the industry, and to highlight geospatial workflows as an enabler for successful PPPs by facilitating more informed decision making among the stakeholders.

**— OBJECTIVES**

- THOUGHT LEADERSHIP
- CONNECTING COMMUNITIES
- KNOWLEDGE SHARING
- GLOBAL OUTREACH
- RAISING INDUSTRY PROFILE
- GLOBALISATION
- PARTNERSHIP
- BUSINESS DEVELOPMENT
